Microsoft Power Platform Services

Modernize utility operations with low-code tools

WDI helps utilities streamline operations, create automated workflows, and transform legacy projects into high-content dashboards that visualize and interpret data using Microsoft Power Platform (MPP).

Our Core Services for Utilities

Power Apps

Dashboards and work order tools to streamline team communication, track project status, and deliver clear reports to leadership

Power Automate

Automates repetitive manual tasks, enhances team collaboration, and connects systems to streamline operations and improve accuracy

Power BI

Transforms cost and time data into visual dashboards and reports, giving leadership clear, actionable insights for better decision-making.

Power Virtual Agents

Custom AI-powered chatbots to support customers and staff with automated, responsive assistance.

Why WDI?

Utility-Focused Expertise: Deep experience modernizing workflows in the utility space.

Custom Solutions: Tailored applications and automations built around your business needs.

Seamless Integration: Built to work with Microsoft 365, Dynamics 365, Azure, and your existing tech stack.

Ongoing Support: From rollout to training and maintenance—we've got you covered.

Why WDI?

- ✓ Accelerate ADMS readiness
- ✓ Improve GIS data reliability
- ✓ Reduce compliance risks
- ✓ Bridge GIS + IT seamlessly
- ✓ High-volume backlog remediation
- ✓ Achieve key performance indicators that matter
